ANOTHER TUNDRA COMPLETED AND FLYING...

On **January 4th, 2007** another customer, Mr. Rosaire Gagne, made his first flight after a successful final inspection by a Transport Canada delegate. The aircraft was taken out for some fast taxi, followed by 3 touch'n go in the pattern at the Bromont airport in Quebec, Canada. Unfortunately, no pictures were taken of the event. This picture was taken just after the introductory flight. Congratulations to Mr. Gagne.

OUR SECOND BUILDER ASSIST PROGRAM WAS A SUCCESS...

Mr. Lynn Sanderson, from Conde SD, was our second customer to take advantage of our new Builder Assist Program in December 2006 at the DreamAircraft factory in order to complete the assembly of his fastbuild kit in 2 weeks. Mr. Sanderson also took a 3rd week of assistance in order to perform his instrument panel, engine and cowling installations.
